3	Name of Unit/Agency/Department Organizing the Activity	Eco Club
4	Name of Collaborating Agency (If Any)	Book Bank Club
5	No. of Student Participants	15
6	No. of Teacher Participants	01
7	Brief Report	The Eco Club, in collaboration with the Book Bank Club, Government Degree College Sainj, organized a Plastic Reuse Initiative titled “Azadi from Plastic: Reuse, Reduce and Recycle” on 13th August 2026 at the College Campus. The activity was organized to promote environmental awareness and celebrate the spirit of Independence Day by encouraging students to take responsibility for a cleaner and greener campus. A total of 15 students and one teacher participated in the activity. The students collected discarded soft drink bottles and other plastic waste found in and around the campus and creatively reused them as plant containers. They also refurbished and reused old pots by cleaning them, removing weeds, and preparing them for planting. The existing pots around the campus were cleaned, weeded, and maintained as part of the activity. The initiative successfully demonstrated how waste materials can be creatively reused instead of being discarded. It encouraged students to adopt the principles of Reuse, Reduce and Recycle and contributed towards maintaining a cleaner, greener, and more sustainable college campus.
